

# Managed IT Checklist.

## CHECKLIST: ARE MANAGED IT SERVICES RIGHT FOR YOUR BUSINESS?

Rather than handling all IT processes internally, many modern businesses opt for outsourced IT management services to fortify their IT infrastructure, navigate risk and compliance, and bolster their competitive standing. Offering expertise in areas such as business application management, custom software development, workforce productivity, cloud migration, cybersecurity, and data protection, these services transform technology into a competitive advantage, enabling businesses to attain exceptional results.

Review the following statements and check those that apply. If you check at least 6 of these statements, Managed IT services will significantly enhance your operational efficiency, while saving your organization money.

### DATA

- Our company routinely saves multiple (edited) versions of the same document.
- It is hard to find data when needed, we have files all over the place.
- We have never tried to recover a file from a backup.
- Our company has sensitive data that would require secure storage.
- It is difficult to remotely access our company's data, applications, and services.

## INFRASTRUCTURE

- We have had outage because we are reaching the maximum storage limit on our internal servers
- We experience slowness or network-related performance issues consistently
- We have not completed an IT assessment in the past 18 months.
- We are paying more and more for cloud infrastructure.
- Our desktops crash frequently or are not responsive.
- It takes days for customer service to resolve my desktop problems.
- We are scared to click on links because we don't know if the email is a phishing attack.

## ORGANIZATIONAL / FINANCIAL

- We are not able to access the information we need if we are in different company locations or when working remotely.
- We always seem to have a problem accessing information an application not working.
- We consume a large amount of time fixing our workstation and not doing the work we need.
- We don't seem to have the latest tools and all our applications are out of date.
- Our IT budget is often being over-spent on in-house maintenance, storage, hardware and licensing.
- We have lost revenue or upset clients/ because our application has not worked when we needed them to. workforce.
